CAMP McKEE

ACTIVITIES!

Our Summer Program Is STEAM-in'

JUNE 10-14

Little Tykes Camp

STEaM Puppetry

(Ages 5-7)

Species from nearly every genus are either threatened, protected, or endangered. Little Tykes Camp introduces "STEaM Puppetry" which explores native Florida species, environmental concerns and stewardship, and storytelling through the art of puppetry. Social disciplines of STEaM will help our campers design and create puppets, build a puppet stage, compose an original play and perform for the patrons and staff of McKee Botanical Garden.

JUNE 17-21

Juniors Camp

Elements of Nature

(Ages 8-9)

Earth, wind, fire, and water represent what every species on planet Earth are made from and what they return to after death. The elements balance the cycle of nature. Campers will explore each of the classical elements through arts and crafts, disciplines of STEaM, representative animals (such as snakes, birds of prey, honey bees, turtles), biomimicry, and so much more. Campers take home a Foldscope, build an underwater ROV (remote operated vehicle) and design and build their own kite.

JUNE 24-28

Lego Robotics Camp

(Ages 10-13)

Who remembers how much fun LEGO's® were growing up? Live vicariously through your children's exploration of LEGO in this week-long camp. Campers will engage in hands-on experiences of core STEaM concepts and link them to the world using LEGO bricks, coding tools, robots, and more. LEGO's have an incredible ability to ignite a child's natural curiosity, their creative spirit, and sharpen their scientific inquiry, engineering design, and data analysis. Our LEGO camp helps children realize their full potential as "digital citizens" and leaders of tomorrow!

Note: Listed activities subject to change photos by Triscia Perri-King and Doreen Franklin

REGISTRATION

Registration continues on the next page. Please complete BOTH sides of this registration form.

For more information call 772.794.0601

Camper's Name _____

RISK FACTORS

McKee Botanical Garden's summer program is ideal for children interested in learning about Florida's wildlife and natural environments. Part of the activities will allow participants to be in contact with wild animals and exploring the outdoors. This experience can be very fun and rewarding. Even though many safety precautions exist, there is always the potential to be injured, bitten or scratched when working with live animals and exploring nature. It is important that you understand and accept these risks before registering your child for this summer program. It is also important that you and your child understand that appropriate behavior is required at all times.

WAIVER FOR MINORS

I accept all risks inherent to the summer education programs at McKee Botanical Garden, including the additional risks that exist when working with or around wild animals and exploring the outdoors, and do hereby release McKee Botanical Garden, its third party vendors, as well as their directors, officers, agents, employees, and members from all liability for injury during the summer program activities. It is further understood that the Garden is not responsible for the loss of personal property, and I understand that daily drop off is no earlier than 8:15 a.m. and I must pick up my child no later than 3:15 p.m. I understand that my child is expected to maintain appropriate behavior. If my child is having difficulty in this area, I understand I will be notified and may be asked to remove my child from the summer program.

I have read the risk factors listed above, and this waiver, and fully understand its contents. I am aware that this is a release of liability and have signed it on my own free will.
